The Great Barrier Reef
 Factual Description

Tuesday Task
 Write the Introduction

The Great Barrier Reef is one of the largest coral reefs in the world and is located in North tropical Queensland.

Some threats to The Great Barrier Reef include ships getting stuck there and leaking oil. Another threat is the crown of thorns starfish because it eats coral.

Write a Descriptive Paragraph about the animals that can be found there.

People may like to visit The Great Barrier Reef because it's the biggest reef on earth and it has lots of beautiful coral.

The Great Barrier Reef is home to many amazing and interesting animals including sea turtles that are really green. There are lots of multicolor fish that swim around all day. There's even some sharks but they're very friendly. There's even some box jellyfish in summer. There's octopus that are not afraid to use their ink.

Write Conclusion

The Great Barrier Reef is such a special place because it's got more than 1000 sea creatures living in the Reef and because it's got lots of rare creatures. The reef is in Queensland and lots of people like to go to Queensland because it is warm.
